

Public Notice – April 10, 2022

This public notice is posted on Advanced Technology Institute's main website (www.auto.edu/resources/student-consumer-information/heerf/) in accordance with U.S. Department of Education guidance.

1. Advanced Technology Institute signed and returned to the U.S. Department of Education the HEERF II & III Applications, Certifications, and Agreements. All funding under this program is to be distributed as emergency grants to students with exceptional need.
2. Advanced Technology Institute has been authorized to draw up to \$604,483 (\$376,476 HEERF II, \$228,016 HEERF III) and award to students for a period of one year from the date funds become available.
3. This funding is estimated to be distributed incrementally to students by May 2022 or sooner. As of March 31, 2022, \$543,800 of the \$604,483 has been distributed to 262 students. Given the fund is nearly exhausted, who receives disbursements and the amount is being adjusted on a day by day basis.
4. To logistically manage these significant funds in a fair manner, the institution will make awards for each student's subsequent (or first) academic year award period. This funding source is included in the ATI Finance Plan (AFP). This means every student would receive consideration over a 7-month period, and continue after that until all funds are disbursed or the grant deadline is reached. Disbursements will be scheduled at the beginning of the student's academic year to coincide with the timing of other financial assistance payments.
5. Advanced Technology Institute is evaluating exceptional need based on the results of the student's Free Application for Federal Student Aid (FAFSA). Students who do not complete a FAFSA may request an assessment, and will be evaluated on a case-by-case basis using information similar to that collected on the FAFSA. Exceptional need is relative to all students attending institutions of higher education, rather than a measure of need relative to other students attending Advanced Technology Institute. With a large percentage of students eligible for Federal Pell Grants, and the majority being career-changing adults, a high percentage of students have exceptional need.
 1. Awards will be presented on the AFP as noted above in the following amounts, revised for award notifications created after January 10, 2022, and may be further modified at a later date for the remainder of the grant period based on available funding.
 2. \$3,000 – Pell Grant Eligible EFC (eligibility index from FAFSA)
 3. \$1500 – EFC 5800 – 10,000
 4. \$1000 – EFC 10,001 – 15,000
6. As provided for in the U.S. Department of Education's guidance, the AFP includes a student choice to apply this funding to tuition, which in most cases will reduce student loan debt. The AFP presents a student's AFP with and without this funding applied to tuition. Reducing debt will often be the student's best use of this funding. Many students have received multiple prior

HEERF disbursements that often were used to cover one-time costs of transitioning to remote learning. Timing of disbursements will approximate Title IV timeline requirements for resolution of credit balances.
